To prevent personation the Medical Officer is requested to identify the soldier before examination as to state of health. This can usually be done by comparison of signature, personal description, or marks on body. In cases of doubt questions should be asked, based on the records of service, the answers to which would not be known to a personator, such as the nature of illness mentioned in the Medical History Sheet, or offences in the Defaulter Sheets, &c., for which purpose the whole of his Discharge Documents are annexed.
