INSTRUCTIONS.—This form is to be completed in the case of every discharged soldier whose claim to pension, on account of disability, is to be submitted for the consideration of the Commissioners of Chelsea Hospital.

Opinion of the Medical Board.

NOTES.—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as, in the event of the man being invalided, it is essential that the Minister of Pensions should be in possession of the most reliable information to enable him to decide upon the man's claim to pension.

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) The rates of pension vary directly according to whether the disability is, (A) caused or aggravated by service in the present war, (B) due to causes not connected with present war, viz. (1) earlier active service, (2) climatic disease in pre-war service, (3) ordinary military service before the war. It is, therefore, essential when assigning the cause of a disability to differentiate between them.

(iv.) In answering question 21 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

(v.) A disability is to be regarded as due to climate when it is caused by military service abroad in climates where there is a special liability to contract the disease.

1. (a.) State whether the disability is clearly attributable to—

(i.) Service during the present war;

no

(ii.) Climate;

no

(iii.) Ordinary military service;

no

(iv.) Want of proper care on the man's part, e.g., intemperance, misconduct, &c.; or

no

(v.) Whether it is constitutional or hereditary.

no

(b.) If due to one of the first three of these causes, to what specific conditions do the Board attribute it?

✓

22. Has the disability been aggravated by any of the conditions mentioned in Question 21, and if so, which?

yes by diet conditions in active service

23. Is the disability permanent?

some interpermt.

24. If not permanent, how soon do the Board recommend re-examination?

25. What is the degree of disablement at which, in the Board's opinion, he should be assessed for pension purposes at present?

Degrees of disablement should be expressed in the following percentages:—100, 80, 70, 60, 50, 40, 30, 20, less than 20, or nil.

100

26. If an operation was advised and declined, was the refusal unreasonable?

no

27. Do the Board recommend—

(a) Discharge as permanently unfit, or

yes

(b) Change to England?

28. If discharge is recommended it should be stated whether further medical treatment (including orthopaedic training) is desirable in a—

(a) Sanatorium;

(b) Hospital;

(c) Convalescent home;

(d) Asylum; or

(e) Other institution either as an in-patient or an out-patient, and if so the period for which recommended.

returns to Newfoundland

Admitted from S. M. B. Weight 133½ lbs. History of pains in stomach of two years duration. Admitted March 30th., 1921

April 14th.

Barium meal given at 11.20 a. m.

Screen prior to meal showed:

Chest clear, hilum in each lung fairly so, diaphragms both working well, right higher than left. No gall-stones to be made out and nothing abnormal in abdomen.

Meal watched entering stomach, no obstruction on entering stomach, which took on an ovoid shape, and in ten minutes in upright position. Peristaltic waves were noticed.

AFTER 15 MINUTES, 11.35 A.M.: First plate taken, showing stomach has taken on a sausage shape and extends almost to the umbilicus and some of the barium has passed through into the pylorus, which appears as a cup to the right side of vertebral column. Small amount of gas in fundus.

AFTER 1 HOUR AND 35 MINUTES, 12.50 P.M.: Second plate taken. The stomach opacity has got appreciably smaller, peristaltic waves markedly evident and more has showing in fundus.

At 2 o'clock screened and stomach emptying. Fundus circular. Antrum taking on a horizontal attitude and becoming elongated. Food seen passing through to right of vertebrae of column.

AFTER 3 HOURS AND 5 MINUTES, 2.30 P.M.: Third plate taken: Stomach opacity still very much smaller, and at a slightly higher level. Gas in fundus.

Screened again at 3.15 p. m. and found that stomach was now empty.

Opinion of the Medical Board.

Notes.—(i.) Clear and decisive answers to the following questions are to be carefully filled in by the Board, as, in the event of the man being invalided, it is essential that the Minister of Pensions should be in possession of the most reliable information to enable him to decide upon the man's claim to pension.

(ii.) Expressions such as "may," "might," "probably," &c., should be avoided.

(iii.) *The rates of pension vary directly according to whether the disability is, (A) caused or aggravated by service in the present war, (B) due to causes not connected with present war, viz. (1) earlier active service, (2) climatic disease in pre-war service, (3) ordinary military service before the war. It is, therefore, essential when assigning the cause of a disability to differentiate between them.*

(iv.) In answering question 21 the Board should be careful to discriminate between disease resulting from military conditions and disease to which the soldier would have been equally liable in civil life.

(v.) A disability is to be regarded as due to climate when it is caused by military service abroad in climates where there is a special liability to contract the disease.

21. (a.) State whether the disability is clearly attributable to—

- (i.) Service during the present war;
- (ii.) Climate;
- (iii.) Ordinary military service;
- (iv.) Want of proper care on the man's part, e.g., intemperance, misconduct, &c.; or
- (v.) Whether it is constitutional or hereditary.
