The Surgeons report that "The patient complains of the weight of both legs. He states he can wear the "HANGER" leg though heavy, but not the "ROWLEY" and he has not had the "ROWLEY" leg on for a very long time.

The first leg weighs 6 lbs. 6 ozs. and needs -

Adjust leg to prevent inversion of foot.	

The patient is a Slipper Manufacturer and sits at work.

With reference to your letter L/55750 M.S.4.D. of the 27th February, 1924, in respect of the above-named Newfoundland pensioner, I beg to inform you that he reported at this Centre on the 14th instant and attention was given to his first replacement artificial limb, the Hanger metal No.2 of March, 1924, in the matter of repairs, which were carried out on the same day and the limb passed as satisfactory.

Attention was also given to his duplicate limb, the Hanger of July, 1919, which was found to be heavy, ill fitting, and weighed $7\frac{1}{2}$ lbs. The limb is considered not to be worth repair and it is recommended that it be replaced by a Hanger metal No.2 as the socket of the first replacement limb will require renewal, an adjustment only being made to the socket of this limb on the 14th instant, necessitated by a change in the pensioner's stump.

I should be glad if the High Commissioner of the Dominion of Newfoundland, might be approached for sanction for the supply of this new Hanger limb and that the matter be treated as one of urgency in view of the state of the socket of the pensioner's other limb.

I am directed by the Minister of Pensions to refer to the pensioner shewn on the enclosed list, who has been supplied with an artificial leg under the maintenance scheme.

29, Tyford Road, Wandsworth Common, S.W.18.

I beg to inform you that the above-named pensioner completed a form requesting attention be given to both of his artificial limbs and attended at this Centre as an Out-Patient on the 6th instant. Action was taken in respect of his Hanger metal limb of October, 1926, in the matter of repairs which were completed on the same day as he reported the limb being passed as satisfactory. The work involved was executed under the maintenance scheme.

His second limb, the Hanger metal of March, 1924, was also dealt with in the matter of repairs as found essential on examination but as far as can be foreseen at present, no further visit on the patient's part will be necessary and on completion of the requisite work, the limb will be returned to him per Carter Paterson.

Yours faithfully,

for Medical Superintendent.
